Aptamers selected by cell-SELEX for application in cancer ...

Aptamers selected by the cell-SELEX method have shown the specificity and high sensitivity required of bioprobes used for the accurate and early diagnosis of tumors. With their high-recognition specificity, aptamers can correctly distinguish different types and even different subtypes, of cancer cells [21].

Cell-SELEX Technology - PubMed Central (PMC)

Another interesting example of Cell-SELEX is the generation of DNA aptamers specifically binding to virus-infected cells. 13 Through the virus infection, the host cell surface is modified by the insertion of viral proteins, and these alterations provide virus-specific targets for the design of specific molecular probes that can recognize and provide molecular signatures for virus-infected cells.
