The new approach results from the recognition that since arteriosclerosis finally leads to various kinds of vascular injury, attention should be focussed on the events preceding the development of the lesions rather than on the lesions themselves. This claim has been confirmed by various model experiments in which vascular injury inflicted under different conditions uniformly led to morphologi

[Arteriosclerosis - Wikipedia](#)

Arteriosclerosis is the thickening, hardening, and loss of elasticity of the walls of arteries. This process gradually restricts the blood flow to one's organs and tissues and can lead to severe health risks brought on by atherosclerosis, which is a specific form of arteriosclerosis caused by the buildup of fatty plaques, cholesterol, and some

[Arteriosclerosis: facts and fancy - ScienceDirect](#)

Discussion: The current classification of arteriosclerosis, as defined in classic textbooks of pathology (e.g., Robbins), contains three lesions: atherosclerosis, M nckeberg's medial calcific sclerosis, and arteriolosclerosis .

Atherosclerosis is a disease of elastic and large muscular arteries in which the atheroma is the characteristic lesion.
