Evolutionary ecology includes aspects of community structure, trophic interactions, life-history tactics, and reproductive modes, analyzed from an evolutionary perspective. Freshwater environments often impose spatial structure on populations, e.g. within large lakes or among habitat patches, facilitating genetic and phenotypic divergence. Traditionally, freshwater systems have featured

Literature on recent freshwater invasions is scarce and, in particular, modern invasions have not been discussed in relevance to evolutionary questions. Information on pathways and mechanisms of freshwater invasion is gaining importance because recent immigrants from salt water are becoming environmental hazards.
