[Immunoproteomics - an overview | ScienceDirect Topics](#)

Immunoproteomics. Immunoproteomics is a branch of proteomic analysis that interrogates the entire antigenic repertoire of a pathogen with the aim of finding antigens that are likely to be immunogenic.

[Immunoproteomics: The Key to Discovery of New Vaccine ...](#)

Immunoproteomics is a powerful technique which has been used to identify potential vaccine candidates to protect against pathogenic bacteria. The combination of proteomics with the detection of immunoreactive antigens using serum highlights immunogenic proteins that are expressed during infection. This is particularly useful when patient serum is used as the antigens that promote a humoral

[Immunoproteomics - Wikipedia](#)

Immunoproteomics is the study of large sets of proteins involved in the immune response. Examples of common applications of immunoproteomics include:
