Meiosis - Wikipedia

Meiosis (/ˈmaɪosɪs/; from Greek μείωσις, meiosis, which means lessening) is a specialized type of cell division that reduces the chromosome number by half, creating four haploid cells, each genetically distinct from the parent cell that gave rise to them. This process occurs in all sexually reproducing single-celled and

Providing consistency and quality standards in the fruit growing industry, Meiosis works with breeders, propagators, triallists and growers to maximise the commercial potential of new soft fruit varieties.

Meiosis Interactive - CELLS alive

Meiosis is important in assuring genetic diversity in sexual reproduction. Use this interactive animation to follow Meiosis I (reduction division) and Meiosis II in a continuous sequence or stop at any stage and review critical events.

Meiosis | HHMI BioInteractive

More About Meiosis. Background. At a genetic level, sexual reproduction is all about mixing up genes and putting together new combinations. The first step in this process is meiosis, a special form of cell division that produces gametes the egg and sperm cells.

Meiosis - Biology Encyclopedia - cells, plant, body, human ...

Meiosis is the two-step series of specialized cell divisions that makes sexual reproduction possible. Meiosis produces haploid cells, which contain just one member of every chromosome pair characteristic of an organism.

Metaphase II - Stages of Meiosis - Online Biology Dictionary

Metaphase II. Note: Meiosis II is very similar to mitosis. In metaphase II, the second stage of meiosis II, in each of the two daughter cells produced by the first meiotic division (which are known as secondary germ cells), the spindle again draws the chromosomes to the metaphase plate.

Célula: División celular - Profesor en línea

Los gametos se originan mediante meiosis, proceso exclusivo de división de las células germinales (o células sexuales). La meiosis es un mecanismo de división celular que a partir de una célula diploide ($2n$) permite la obtención de cuatro células haploides (n) con diferentes combinaciones de genes.
