Read "Practical SPECT/CT in Nuclear Medicine" by with Rakuten Kobo. Nuclear Medicine is a diagnostic modality which aims to image and in some cases quantify physiological processes in the

Nuclear medicine - Wikipedia

Nuclear medicine is a medical specialty involving the application of radioactive substances in the diagnosis and treatment of disease. Nuclear medicine, in a sense, is "radiology done inside out" or "endoradiology" because it records radiation emitting from within the body rather than radiation that is generated by external sources like X-rays.
