Metabolic Engineering - Journal - Elsevier

Metabolic Engineering (MBE) is devoted to the publication of original research papers on the directed modulation of metabolic pathways for metabolite over production or the improvement of cellular properties. Papers describing native pathway engineering and synthesis of heterologous pathways for converting microorganisms into microbial cell factories are also welcome.

### 3 Energy Systems - The Three Metabolic Energy Systems

The three metabolic energy pathways are the phosphagen system, glycolysis and the aerobic system. How do they work, and what is their effect? Albert Einstein, in his infinite wisdom, discovered that the total energy of an object is equal to the mass of the object multiplied by the square of the speed of light.
