Uniform space - Encyclopedia of Mathematics

Any uniform space  $(X, \mathcal{A})$  can be uniformly imbedded as an everywhere-dense subset in a unique (up to a uniform isomorphism) complete uniform space  $(\tilde{X}, \tilde{\mathcal{A}})$ , which is called the completion of  $(X, \mathcal{A})$ . The topology of the completion  $(\tilde{X}, \tilde{\mathcal{A}})$  of a uniform space  $(X, \mathcal{A})$  is compact if and only if  $\mathcal{A}$  is a pre-compact uniformity (that is, such that any uniform spaces and measures | Download eBook pdf, epub ...

Uniform measures are certain functionals on the space of bounded uniformly continuous functions on a uniform space. They are a common generalization of several classes of measures and measure-like functionals studied in abstract and topological measure theory, probability theory, and abstract harmonic analysis. They offer a natural framework for results about topologies on spaces of measures
