Agricultural water reuse and guidelines - watertechnology.com

Wastewater is an ideal source for recycling because it is collected and delivered to water treatment facilities as sewage, thus taking advantage of the existing infrastructure and obviating the high cost of collection and transport that limits other types of product recycling. Finally, beneficial reuse eliminates the disposal costs and the environmental concerns of discharges to ambient waters.

Wastewater management: I. Introduction - GreenFacts
Increased understanding of the links between wastewater and health, ecosystem functioning and the potential benefits of wastewater reuse in contributing to development and improved wellbeing, can increase uptake of initiatives.

Nutrients and Digestate Management | Anaergia
Biosolids left over after anaerobic digestion have historically been considered a waste stream to be discarded, which equates to significant cost and liability.

Canada-wide strategy for municipal wastewater effluent

separate storm water facilities, septic tank discharges to infiltration facilities, air emissions, effluent reuse or the management of biosolids. The Strategy aims to ensure that owners will have regulatory clarity in managing municipal wastewater.

Wastewater treatment and water reuse - ScienceDirect
From the technological point of view, wastewater treatment and reuse are entering in an era of the establishment of the nexus energy-water, and wastewater treatment plants are no more considered as big energy consumers, but studied as a facility that could be neutral in terms of energy consumption.

Wastewater management and water recycling - Water quality

Water recycling refers to the treatment and reuse of sewage, greywater and/or stormwater, for non-potable purposes. NSW Health supports the reuse of treated

wastewater provided the health risks are adequately managed.

Wastewater Treatment and Reuse - AFED home page
110 chapter 7 WasteWater treatment and reuse 0.24 billion km³ of wastewater, of which less than 30% is reused to irrigate vineyards, citrus

Wastewater | EPA

Wastewater management includes the segregation, collection, treatment, storage, reuse and disposal of wastewater. Provided it is undertaken in a sustainable manner, the EPA considers that the reuse of treated effluent from these activities could provide huge environmental and economic benefits to the state.

Wastewater reuse | YourHome

On-site wastewater reuse can reduce water use in both urban and rural households. At present, most homes use potable (drinkable) water for practically everything in the house and garden.

Wastewater Resource Recovery | Anaergia

Wastewater Resource Recovery Anaergia provides solutions to increase the efficiency of municipal and industrial wastewater treatment facilities, transforming them into assets that are net producers of clean electricity, clean water, and fertilizer.

Wastewater Reuse and Management - Kobo.com

Wastewater Reuse and Management represents a valuable resource to academic researchers, students, institutions, environmentalists, and anyone interested in environmental policies aimed at safeguarding both the quality and the quantity of water.

Water Recycling and Reuse | Region 9: Water | US EPA

Recycling gray water saves fresh potable water for other uses, reduces the volume of wastewater going to septic systems and wastewater treatment plants, and increases infrastructure capacity for new users.
